SUMMARY

B.Sc. in Human Science graduate currently pursuing a PG Certification in Data Science & Analytics with AI. Proficient in SQL, Microsoft Excel, Power BI, Tableau, Python, and Machine Learning, with hands-on experience in data cleaning, data visualization, statistical analysis, and dashboard development. Skilled at transforming raw data into actionable, data-driven insights.

SKILLS

- Database & Querying – MySQL, SQL, Joins, Subqueries, Relational Databases.
- Data Cleaning & Visualization Tools – Microsoft Excel (Pivot Tables, Dashboards), Microsoft Power BI (DAX), Tableau.
- Programming Language – Python (NumPy, Pandas, Matplotlib, Seaborn, BeautifulSoup).
- Statistics & Statistical Analysis.
- Machine Learning & Predictive Modelling.
- Data Analysis, Data Visualization & Business Intelligence (BI) Reporting.

PROJECTS

Kickstarter Projects Data Insights | Tool: Excel

[GitHub](#)

- Built an interactive Excel dashboard using Pivot Tables, formulas, and data visualization to analyse Kickstarter project trends, funding, and success rates.
- Created KPI cards and visualizations to highlight category performance and launch trends.

FlyBuddy – The Airline Management System | Tool: MySQL

[GitHub](#)

- Developed a MySQL-based Airline Management System (relational database design) to manage passengers, flights, bookings, and tickets.
- Used SQL joins and subqueries to analyse booking data and extract meaningful insights.

Indian Tourism Intelligence | Tool: Microsoft Power BI

[GitHub](#)

- Analysed Indian tourism data (2020–2025) to identify visitor, revenue, and seasonal trends.
- Built interactive Power BI dashboards using DAX and data modelling to analyse destinations, bookings, and visitor preferences.

Road Accident Analysis | Tool: Tableau

[GitHub](#)

- Analysed 1.95M+ road accident records (2019–2022) to track accidents, fatalities, severity, and YoY trends.
- Built an interactive Tableau dashboard with filters and drill-downs to identify accident patterns across vehicles, weather, road conditions, and locations.

Web Scraping Project | Tool: Python, Power BI

[GitHub](#)

- Scraped and analysed 960 Flipkart laptop listings using Python, BeautifulSoup, and Pandas for data extraction and cleaning.

- Built a Power BI dashboard to analyse pricing, discounts, brand performance, and customer ratings.

Mobile Data Usage Prediction | Tool: Python, Machine Learning, Streamlit

[GitHub](#)

- Developing a Machine Learning model to predict monthly mobile data usage based on user activity patterns.
- Built a Streamlit-based recommendation system to suggest suitable data plans.

EDUCATION

Bachelor of Science in Human Science	9.77 CGPA
Mumbai University	2025
HSC (12th)	64.50%
Maharashtra State Board	2022
SSC (10th)	87.80%
Maharashtra State Board	2020

COURSE

Master in Data Science and Analytics with AI	Pursuing
IT Vedant Education Institution	2026

CERTIFICATION

- Advanced Excel, IT Vedant Education Institution.
- MySQL Mastery, IT Vedant Education Institution.
- Power BI, IT Vedant Education Institution.
- Tableau Essentials, IT Vedant Education Institution.
- Python Essential for Data Science, IT Vedant Education Institution.
- NumPy and Statistical Analysis, IT Vedant Education Institution.
- Applied Data Analysis with Python, IT Vedant Education Institution.
- Machine Learning Mastery, IT Vedant Education Institution.
- Master in Data Science and Analytics with Artificial Intelligence, IBM Skills Network.
- Data Analysis with Python, IBM Skills Network.

ACHIEVEMENTS

- Monsoon Hackathon 2026
Won 3rd Prize at Monsoon Hackathon 2026 (I.T. Vedant) for building a Power BI-based Flood Prediction Analysis dashboard as part of a 4-member team.
